

Plug & Chain Assemblies

Two Piece Assemblies

These two-piece nut and blind nipple assemblies are made to CGA standards and make a gas tight seal.

One-Piece Assemblies (With Chain)

(With Chain)

These shorter one-piece plug and chains can be used, where space is limited, to seal off cylinder valves and still

be able to install the cylinder valve cap. The part makes a gas tight seal. Nipples have replaceable soft tips or o-rings.

One-Piece Assemblies (Without Chain)

(Without Chain)

These shorter one-piece plugs (sold without chains) can be used, where space is limited, to seal off cylinder valves and still be able to install the cylinder valve cap. The part makes a gas tight seal. Nipples have replaceable soft tips or o-rings.

Dust Cap & Chain Assemblies (Non-Gas Tight)

Dust Cap & Chain Assemblies (Non-Gas Tight)

Dust caps are one-piece blind nuts used to protect threads and keep some contamination from cylinder valves. CGA thread specifications are used, but they do not make a gas tight seal.
